Su beneficio de farmacia utiliza una Lista de Medicamentos. La Lista de Medicamentos es una guía de los medicamentos seleccionados por el Comité de Farmacia y Terapéutica de Triple-S Salud, la cual representa los medicamentos necesarios para un tratamiento de alta calidad. Nuestro Comité de Farmacia y Terapéutica está compuesto por médicos, farmacéuticos clínicos y otros profesionales de la salud, quienes se reúnen periódicamente para evaluar y seleccionar aquellos medicamentos que serán incluidos en esta Lista de Medicamentos. Esta selección se hace a base de la seguridad, efectividad y costo de los medicamentos.

Your pharmacy benefit uses a Drug List. The Drug List is a guide of drugs selected by Triple-S Salud's Pharmacy and Therapeutics Committee, which represents prescription therapies necessary for a high quality treatment program. También se incluye una descripción de los éditos de análisis de utilización para la evaluación de dosis e identificar terapias duplicadas. Estos éditos están disponibles a través del sistema de procesamiento y adjudicación de reclamaciones de MC-21 Corporation.

¿Cuánto voy a pagar por los medicamentos cubiertos? / How much will I pay for covered drugs?

Los medicamentos en la lista de medicamentos se clasifican por niveles, excepto aquellos con \$0 copago, si son prescritos o provistos por proveedores participantes, según requiere la Ley Federal. Estos niveles identifican los diferentes niveles de costo compartido, o sea lo que usted paga, por los medicamentos en la receta. Estos niveles son los siguientes:

- Nivel 1 – Medicamentos Genéricos
- Nivel 2 – Medicamentos de Marca Preferidos
- Nivel 3 – Medicamentos de Marca No Preferidos
- Nivel 4 – Medicamentos Especializados o Biotecnológicos Preferidos
- Nivel 5 - Medicamentos Especializados o Biotecnológicos No Preferidos

The prescription drugs in the Drug List are classified by levels, except for those with \$0 copay, if prescribed or provided by participating providers, as required by Federal Law. These levels identify the different levels of cost-sharing, that is, what you pay, for the drugs in your prescription. These levels are the following:

- *Level 1 – Generic Drugs*
- *Level 2 – Preferred Brand Drugs*
- *Level 3 – Non-Preferred Brand Drugs*
- *Level 4 – Preferred Specialty or Biotech Drugs*
- *Level 5 – Non-Preferred Specialty o Biotech Drugs*

Usted debe verificar en su Manual de Beneficios Sección 5(f) cuánto es el copago o coaseguro que pagará por el medicamento, dependiendo del nivel en que se encuentra. A los siguientes medicamentos les aplican \$0 copago, si son recetados o suministrados por proveedores participantes, según requerido por la Ley Federal:

- Anticonceptivos aprobados por la FDA (incluyendo OTC y con receta médica)¹
- Fluoruro (hasta los 6 años)

Su cubierta de farmacia les provee a sus asegurados el Programa de Medicamentos OTC con \$0.00 copago si son prescritos y provistos por proveedores participantes.

Your pharmacy coverage provides an OTC Drug Program with \$0 copayment if prescribed or provided by participating providers.

¿Qué son Medicamentos Genéricos (Nivel 1)? / What are generic drugs (Level 1)?

Un medicamento genérico tiene el mismo ingrediente activo en la fórmula que un medicamento de marca. Los medicamentos genéricos usualmente cuestan menos que un medicamento de marca y son aprobados por la Administración de Drogas y Alimentos (FDA, por sus siglas en inglés).

A generic drug has the same active-ingredient formula as the brand name drug. Generic drugs usually cost less than brand name drugs and are approved by the Food and Drug Administration (FDA).

Su cubierta de farmacia requiere el despacho del medicamento genérico como primera opción, siempre y cuando el medicamento genérico exista en el mercado. Si usted o su médico eligen un medicamento de marca en lugar de la versión genérica existente, usted pagará el copago del medicamento genérico, más la diferencia entre el costo del medicamento de marca y el medicamento genérico; aún cuando su médico indique “original” o “no sustituir”. Usted tiene derecho a someter una justificación médica para que se le cubra un medicamento de marca que tiene disponible un medicamento genérico. Si la justificación medica es aprobada usted pagará el copago correspondiente al Nivel 3.

*Your pharmacy coverage requires the dispensing of generic drugs as a first option, as long as the generic drugs are available in the market. **If you or your doctor chooses a brand drug instead of the generic version, you will pay the generic drug copayment, plus the difference in cost between the brand drug and the generic drug; even though your physician has specified “Dispense as Written”.** You have the right to submit a medical justification requesting coverage of a brand product with a generic equivalent. If your request is approved you will pay the corresponding copay to Level 3.*

² Applies to the following contraceptives: Female Condom, Oral Contraceptivos, Intrauterine Device (IUD), Diaphragm, IUD Mirena[®], Plan B[®], Spermicides (Foam OTC), Ortho Evra Patc[®], NuvaRing[®].

Recomendamos a los asegurados que utilicen los medicamentos genéricos. Estos son iguales en potencia, dosis y aprobados por la FDA.

We recommend members use generic drugs. They are equal in strength and dosage, as well are approved by the FDA.

¿Qué son Medicamentos Preferidos (Nivel 2)? / What are preferred drugs (Level 2)?

Hay ciertos medicamentos de marca que han sido seleccionados por el Comité de Farmacia y Terapéutica como agentes preferidos luego de su evaluación de seguridad, eficacia y costo. Los mismos están identificados a la derecha como Nivel 2. En aquellas clases terapéuticas donde no hay genéricos disponibles, les exhortamos que utilice como primera alternativa aquellos medicamentos identificados como preferidos.

There are certain brand name drugs classified by the Pharmacy and Therapeutics Committee as preferred agents based on evaluation in terms of safety, effectiveness and cost. These are identified with a Level 2 placed to the right of the name of the drug. In those therapeutic classes where there are no generic drugs available, we recommend you to use drugs identified as preferred as a first alternative.

¿Qué son medicamentos de Marca No Preferidos (Nivel 3)? / What are Non-Preferred Brand drugs (Level 3)?

Un medicamento es clasificado como “no preferido” porque existen alternativas en los niveles anteriores que son más costo-efectivos o con menos efectos secundarios. Si usted obtiene un medicamento de marca del Nivel 3, usted tendrá que pagar un costo mayor por el medicamento.

Non preferred drugs are classified as medications that have other available options of treatment which are more cost effective and/or with lesser side effects.

¿Qué son medicamentos Especializados o Biotecnológicos Preferidos (Nivel 4)? / What are Preferred Specialty Drugs (Level 4)?

Los medicamentos especializados requieren una administración y/o un manejo especial, por su compleja composición. Estos se utilizan para el tratamiento de condiciones crónicas y de alto riesgo que requieren un manejo especial de la condición.

Specialty Drugs require special administration and/or management due to their complex composition. These are used for the treatment of high risk and chronic conditions that require special management.

El Nivel 4 identifica los medicamentos o productos en la Lista de Medicamentos que se ofrecen bajo el Programa de Medicamentos para Condiciones Especiales. Los medicamentos en este nivel incluyen medicamentos genéricos, biosimilares (genéricos de productos biológicos) y de marca a un costo menor. A su vez, conlleva un arreglo especial para su despacho.

The Level 4 identify the medications or products in the Drug List are offered under the Program Special Drug Conditions. The drugs in this tier include generics, biosimilars (generic biologics) and brand drugs at a lower cost and a special arrangement for its dispatch.

¿Qué son los medicamentos Especializados o Biotecnológicos No Preferidos (Nivel 5)? / What are Non Preferred Specialty or Biotech Drugs (Level 5)?

El Nivel 5 incluye los Medicamentos Especializados No Preferidos. Los medicamentos en este nivel también tienen un arreglo especial para su despacho, sin embargo conllevan un costo mayor que los del Nivel 4. Estos se utilizan también para el tratamiento de condiciones crónicas y de alto riesgo que requieren una administración y manejo especial.

The Level 5 includes Non-Preferred Specialized Drugs. The drugs in this level also have a special arrangement for its dispatch, but have a higher copayment when compared to drugs from Level 4. These medications treat chronic and high-risk conditions that require special handling and administration.

Éditos de Análisis de Utilización / Edits for Drug Utilization Analysis

A través del Programa de Farmacia de Triple-S Salud se han implantado los siguientes éditos de análisis de utilización (*DUR*, por sus siglas en inglés) con el propósito de ofrecer un mejor cuidado para el asegurado al evitarle complicaciones.

Through the Pharmacy Program, Triple-S Salud has implemented the following edits for drug utilization (DUR) in order to avoid complications to the insured persons while offering a better care.

- Los Editos de Validación de Dosis se utilizan para cotejar dosis máximas diarias usando como referencia las dosis pediátricas, de adultos y geriátricas de acuerdo a la información suministrada por *Medi Span*. En la mayoría de los casos, la dosis máxima es aquella aprobada por la *FDA*.
Dose check edits are used for daily maximum dosages, using as reference the pediatric, adult and geriatric dosages according to Medi Span. In the majority of cases, the maximum dosage is the one approved by the FDA.
- Los Editos de Terapia Duplicada se utilizan para verificar el historial de medicamentos del asegurado para recetas duplicadas, de dos formas:

Duplicate Therapy edits verify the member`s drug history for duplicate prescriptions, in two aspects:

1. El asegurado recibe el mismo medicamento (Ej. mismo ingrediente activo) con dos recetas distintas (Ej. número de receta distinto, puede ser la misma farmacia o farmacias diferentes).
The member receives the same medication (e.g. same active ingredient) with two different prescriptions (e.g. Prescription number is different; it could be through the same pharmacy or different ones).
2. El asegurado recibe dos medicamentos de la misma clase terapéutica, como por ejemplo, dos antidepresivos o dos analgésicos, entre otros.
The member receives two drugs of the same therapeutic class, for example: two anti-depressants or two analgesics.

Hay ciertas excepciones a estos éditos. Para evitar que el sistema rechace servicio a los asegurados, les solicitamos a los médicos y dentistas que incluyan la siguiente información en la receta del asegurado:

There are exceptions to these edits. In order to prevent the system from denying the service, we suggest that physicians include the following information in the member`s prescription:

- Cambio en Dosis / *Change in Dosage*

Si aumentó la dosis y el asegurado necesita más medicamentos antes de tiempo - En este caso se necesitará una carta de justificación de parte del médico indicando el cambio en dosis. La farmacia requerirá una preautorización a MC-21 Corporation, luego de que se reciba la información necesaria de la receta.

If the dosage increases and the member need medication right away, it will require a letter from the physician justifying the dosage. The pharmacy will require a pre-authorization from MC-21 Corporation after receiving the necessary information regarding that prescription.

- Si la dosis se determina por el peso del asegurado, el médico deberá indicar el peso y la estatura en la receta.
If the dosage is determined by the member`s weight, the physician must indicate the weight and height in the prescription.
- Cuando la dosis del medicamento se ajuste de acuerdo a los niveles en sangre, el médico deberá indicarlo así en la receta (Ej. Ajuste de niveles para tiroide, teofilina, anticonvulsivos, warfarina).
When the dosage of the drug is adjusted according to blood levels, the physician must indicate it in the prescription (e.g.: adjustments for thyroid, theophylline, anti-convulsivants, and warfarins).

Cuando la dosis indicada en la receta no existe en la presentación farmacéutica. Por ejemplo, la tableta viene de 25 mg y 50 mg pero el paciente necesita 75 mg (dosis indicada y aceptada). La farmacia requerirá una preautorización a MC-21 Corporation, luego de que se reciba la información necesaria en la receta (se requiere copia de la receta y hoja de preautorizaciones de MC-21.)

When the dosage indicated in the prescription does not exist in the pharmaceutical dosage form of the medication. For example, the tablet exists in 25 mg and 50 mg, but the patient needs a 75 mg dosage (dose required and accepted). The pharmacy will require a pre-authorization from MC-21 Corporation after receiving the necessary information for the prescription (a copy of the prescription will be required and copy of the pre-authorization form from MC-21 Corporation).

Política para el Mantenimiento de la Lista de Medicamentos / *Policy for the Maintenance of the Drug List*

El Comité de Farmacia y Terapéutica se reúne mensualmente, por lo que la Lista de Medicamentos está en constante revisión. El Comité está integrado por médicos participantes de Triple-S Salud, Inc., farmacéuticos clínicos y administradores, cuyo propósito primario es recomendar las políticas que deben establecerse en la evaluación, selección y uso terapéutico de medicamentos en el ambiente de cuidado de la salud. Los médicos que no son empleados ni poseen intereses financieros en Triple-S Salud, Inc. o en *MC-21 Corporation* son los únicos miembros con derecho al voto. Los profesionales de la salud empleados de Triple-S Salud, Inc. y *MC-21 Corporation* que participan en el Comité de Farmacia y Terapéutica no tienen derecho al voto y asisten a las reuniones en calidad de coordinadores y administradores del plan.

The Therapeutics and Pharmacy Committee meets every month, meaning that the Drug List is revised constantly. The Committee is composed of Triple-S Salud's participating physicians, dentists, pharmacists and administrators whose main purpose is to recommend policies to be established for evaluation, selection and therapeutic use of medications within the health care environment. Physicians not employed by or having business and financial interests in Triple-S Salud, Inc. or MC-21 Corporation are the only members having the right to vote. Health professionals employed by Triple-S Salud, Inc., and MC-21 Corporation participating in the Therapeutics and Pharmacy Committee does not have the right to vote. They attend Committee meetings as coordinators and health plan administrators.

El añadir o eliminar los medicamentos en la Lista se hará a base de su eficacia comparativa y de los parámetros específicos del medicamento, tales como los perfiles de efectos secundarios y contraindicaciones. Las evaluaciones se harán a base de información de referencias médicas reconocidas, literatura primaria y guías que establecen las pautas de la práctica (standard practice guidelines). También se tomará en cuenta el costo, aunque éste será el último criterio a considerar en la toma de decisiones. Las evaluaciones toman en consideración la siguiente información:

Additions or exclusions of drugs from the Drug List will be based on the comparative efficacy and specific parameters of the drug, such as profiles on secondary effects and contra-indications. The evaluations will be conducted based on information obtained from recognized medical references, primary literature and standard practice guidelines. Also, they will consider the cost, although this is the last criteria considered in the decision making. The evaluation considers the following information:

- Seguridad / *Safety*
- Eficacia / *Efficacy*
- Estudios comparativos disponibles en la literatura médica / *Comparative studies available in the medical literature*
- Indicaciones del producto / *Product indications*
- Perfil de efectos secundarios / *Profile on secondary effects*
- Contraindicaciones / *Contra-indications*
- Perfil farmacocinético / *Pharmacokinetic profile*
- Factores que ayudan o impiden que el paciente asegurado cumpla con la terapia / *Factors that help or prevent the insured person from complying with the therapy*
- Costo y estudios farmacoeconómicos cuando los mismos estén disponibles / *Costs and pharmaco-economic studies, when they are available*

El Comité establece las prioridades de los medicamentos a evaluar, de acuerdo a los siguientes criterios:

The Committee establishes the priorities for the evaluation of drugs according to the following criteria:

- Análisis de utilización de medicamentos No Preferidos que son recetados frecuentemente. Estos medicamentos serán considerados para inclusión en otros niveles. / *Utilization analysis for Non-Preferred drugs that are frequently prescribed. These drugs will be considered for future inclusion in other levels.*
- Medicamentos que han sido aprobados recientemente por la FDA. / *Drugs recently approved by the FDA.*
- Solicitud por parte de un médico o dentista participante de Triple-S Salud, Inc. (Ver la sección de políticas para que los médicos y dentistas participantes de Triple-S Salud, Inc. soliciten la inclusión y/o exclusión de medicamentos en la Lista de Medicamentos.) / *A request made by a participating physician or dentist in Triple-S Salud' network. (Please refer to the policies established for participating physicians and dentists to request the inclusion or exclusion of drugs from the Drug List).*

Cuando se añada un medicamento a una clase terapéutica, se hará una evaluación de los medicamentos de esa clase que podrían ser eliminados, si alguno.

When a drug is added to a therapeutic class, an evaluation will be made for those drugs that could be eliminated from that class, if any.

Aquellos medicamentos que reciben la designación No Preferido, indica que luego de la evaluación hecha por el Comité de Farmacia y Terapéutica, éstos no ofrecen ventajas clínicas y económicas en comparación con otras alternativas disponibles. En otros casos podría ser que, al momento de hacer la evaluación, no haya suficiente evidencia disponible en la literatura médica para justificar su uso clínico. Además, es posible que algunas presentaciones de los productos no sean de uso ambulatorio y sólo se utilicen en el hospital.

Drugs that are designated as non-Drug List after evaluation from the Committee, are considered not to offer clinical and economic advantages in comparison with other alternatives available. In some instances, it could be that no evidence is available in the medical literature that justifies their clinical use at the time of the evaluation. There may be a possibility that certain presentations do not have an out-patient use and their use is exclusively on an in-patient basis.
