

The survey measures the members experiences with health care including health plan accessibility of services and communications skills of providers. It also measures health plans performance on important dimension of care and service.

The final sample included 1,100 members of Triple-S Salud whose primary coverage was through a commercial product line. Eligible members were defined as plan members who were 18 years or older as of December 31, 2017; were currently enrolled; had been continuously enrolled for twelve months. Survey was conducted between February 16 and May 15, 2018.

Triple-S Ratings

■ 2017 CSS FEHB Average

Rating questions use a 0 to 10 scale with 10 being the most favorable response. Results are reported as the proportion of members selecting one of the top three responses (8, 9, or 10). The CSS FEHB Average is calculated by pooling survey responses across 11 representative Adult Commercial plans surveyed by CSS.

Composite Measure

Composite measures combine results from related survey questions into a single measure to summarize health plan performance. (*Less than 100 responses)
