INTRODUCCIÓN / INTRODUCTION

Esta Lista de Medicamentos se divide en tres partes.

This Drug List is divided into three parts.

La **primera parte** es un resumen que te provee información sobre la forma en que se diseñó la Lista de Medicamentos Genéricos. También se incluye una descripción de los éditos de análisis de utilización para validar dosis e identificar terapias duplicadas.

*The **first part** is an outline that provides information about the way the Generic Drugs List was designed. It includes a description of the utilization analysis edits used to validate dose and identify duplicate therapies.*

La **segunda parte** contiene los medicamentos por clasificación terapéutica.

*The **second part** has the drugs by therapeutic category.*

La **tercera parte** contiene los apéndices y una lista por orden alfabético (índice) de los medicamentos disponibles en la Lista de Medicamentos.

*The **third part** has the appendixes and a list in alphabetical order (Index) of drugs available in the Drug List.*

El hecho de que un medicamento recetado se incluya en este Formulario no garantiza que esté cubierto bajo su plan. Es importante que consulte el Beneficio de Farmacia de su plan para determinar si un medicamento que forma parte de este Formulario está cubierto bajo su plan. Por favor, revise su Beneficio de Farmacia para confirmar que su medicamento está cubierto.

The fact that a prescription medication is included in this Formulary does not guarantee that it is covered under your plan. It is essential that you review the Pharmacy Benefit of your plan to determine if a medication listed in this Formulary is covered under your plan. Please review your Pharmacy Benefit to confirm that your medication is covered.

PARTE I - DISEÑO DE LA LISTA DE MEDICAMENTOS GENÉRICOS/ PART I - GENERIC DRUG LIST DESIGN

¿Cómo usar esta Lista de Medicamentos Genéricos? / How do I use the Generic Drug List?

La forma más fácil para conseguir los medicamentos es buscando en el índice. El índice provee una lista por orden alfabético de todos los medicamentos que se presentan en este documento. Al lado del medicamento está el número de la página donde encontrarás cómo está cubierto. Busca la página indicada en el índice y encuentra el nombre del medicamento en las columnas.

The easiest way to find the drugs is through the Index. The Index gives you an alphabetical list of all the drugs in this document. Next to the drug, you will see the page number where you can find the coverage information. Turn to the page listed in the Index to find the name of the drug listed in the columns.

Guías de Referencia / Reference Guidelines

Medicamentos que requieren preautorización (PA) / Medications that require prior authorization (PA)

En un esfuerzo por garantizar la seguridad y el uso apropiado de los medicamentos, algunos necesitan una preautorización para ser adquiridos. Los mismos se han identificado a la derecha con **PA (requiere preautorización)**, en cuyo caso, la farmacia gestiona la preautorización previo al despacho del medicamento.

To guarantee the safe and effective use of drugs, there are certain drugs that need a prior authorization (PA) before dispensing it. A PA is placed next to the name of the drug to identify them, and the pharmacy will process the prior authorization before dispensing it.

Los medicamentos que requieren preautorización usualmente son candidatos al uso inapropiado o están relacionados con un costo elevado por lo que requieren que el asegurado cumpla con unos criterios antes de ser despachados. Aquellos medicamentos que han sido identificados que requieren preautorización deben satisfacer los criterios clínicos establecidos según lo haya determinado el Comité de Farmacia y Terapéutica. Estos criterios clínicos se han desarrollado de acuerdo a la literatura médica actual.

The drugs that need prior authorization are those for which you need to meet certain criteria before using them, are likely to be used inadequately, or have a higher cost. Drugs identified as needing preauthorization should fulfill the clinical criteria, as determined by the Pharmacy and Therapeutics Committee. The criteria have been developed as stated by current medical literature.

También, tienen requisito de PA aquellos medicamentos cuyos costos excedan \$750.00 (verifica tu certificado de beneficio ya que esta cantidad puede ser diferente). La farmacia enviará copia de la receta y se encargarán del proceso.

Drugs whose cost goes beyond \$750.00 will require a prior authorization (check your health plan benefits, as this amount could be different). The pharmacy will send a copy of the prescription to the health plan and will take

care of the process.

Programa de Terapia Escalonada (ST) / Step Therapy Program (ST)

En algunos casos, requerimos que utilices primero un medicamento como terapia para tu condición antes de que cubramos otro para esa condición (Terapia Escalonada, ST por sus siglas en inglés). Por ejemplo, si el Medicamento A y el Medicamento B se usan ambos para tratar tu condición médica, nosotros requerimos que utilices primero el Medicamento A. Si el Medicamento A no te funciona, entonces cubrimos el Medicamento B.

In some cases, you need to try one drug first to treat your health condition before we cover other drugs for the same condition (Step Therapy). For example, if Drug A and Drug B both treat your health condition, you may need to use Drug A first. If Drug A does not work for you, then we will cover Drug B.

Límites de cantidad (QL) / Limits on the amount to be dispensed (QL)

Ciertos medicamentos tienen un límite en la cantidad a despacharse. Estas cantidades se establecen de acuerdo a lo sugerido por el fabricante como la cantidad máxima adecuada que no está asociada a efectos adversos y la cual es efectiva para el tratamiento de una condición. En la columna de requisitos de la lista de medicamentos se identificaron los límites en la cantidad a despacharse, en aquellos que aplique.

Certain drugs have a limit on the amount to be dispensed. These amounts are established according to the manufacturer's recommendation for adequate amounts to avoid adverse effects and effectively treat a health condition. The Requirements column in the Drug List points out the quantity limits for applicable drugs.

Límites de especialidad médica (SL) / Medical specialty limits (SL)

Algunos medicamentos tienen un límite en la especialidad médica. Estos límites de especialidad se establecen de acuerdo a la literatura médica actual. El Apéndice III contiene la lista de los medicamentos que tienen límite de especialidad médica.

Some drugs have medical specialty limits. These limits are established in line with current medical literature. Appendix III features the list of drugs that have a specialty limit.

Límites de edad (AL) / Age Limits

Algunos medicamentos tienen un límite de edad.

Some drugs have an age limit.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]; SL = Specialty Limit [Límite de Especialidad]

Uso de Medicamentos investigacionales o experimentales / *Use of investigational or experimental medications*

Los medicamentos recetados para propósitos investigacionales, experimentales o no aprobados por la FDA, no se cubren en ningún plan de salud o cubierta de farmacia.

Investigational or experimental drugs, or those not approved by the FDA, are not covered by all health plans or pharmacy coverage.

Éditos de análisis de utilización (DUR) / *Drug utilization review (DUR)*

A través del Programa de Beneficio de Farmacia de Triple-S Salud, Inc. se han implantado los siguientes éditos de análisis de utilización (DUR, por sus siglas en inglés) con el propósito de evitarle complicaciones, ofreciendo un mejor cuidado.

Through the Pharmacy Benefit Management Program, Triple-S Salud has implemented the edits below for drug utilization reviews (DUR) to avoid other health problems while offering a better care.

- Édito de Validación de Dosis -coteja las dosis máximas diarias para la población pediátrica, adulta y geriátrica. / *Dose check edits – Verify daily maximum doses for pediatric, adult and geriatric population. In most cases, the maximum dose is the one approved by the FDA.*
- Édito de Terapia Duplicada -verifica tu historial de medicamentos para recetas duplicadas, de dos formas:/ *Duplicate Therapy Edits – Verifies the Drug history for duplicate prescriptions in two ways:*
 1. Si recibes el mismo medicamento (Ej. mismo ingrediente activo) con dos recetas distintas (Ej. número de receta distinto, puede ser la misma farmacia o farmacias diferentes). / *If you get the same drug (e.g. same active ingredient) with two different prescriptions (e.g. prescription number is different, could be through the same pharmacy or different ones).*
 2. Si recibes dos medicamentos de la misma clase terapéutica, por ejemplo, dos antidepresivos o dos analgésicos, entre otros. / *If you get two drugs of the same therapeutic class, such as two anti-depressants, or two analgesics.*
