INTRODUCCIÓN / INTRODUCTION

Tu cubierta de farmacia utiliza una Lista de Medicamentos Preferidos que te ofrece una selección amplia de opciones de tratamiento.

Your pharmacy coverage uses a Preferred Drug List that offers you a wide selection of treatment options.

La Lista de Medicamentos Preferidos es una guía que identifica los medicamentos preferidos. Esta lista incluye medicamentos genéricos, marca y especializados. La lista muestra los medicamentos por clasificación terapéutica y un listado por orden alfabético (Índice) de los medicamentos disponibles. La Lista de Medicamentos Preferidos no incluye todos los medicamentos con receta cubiertos bajo el Beneficio de Farmacia. Para información adicional, puedes hacer referencia a tu póliza.

The Preferred Drug List is a guide that identifies preferred drugs. This list includes generic, brand and specialty drugs. The list displays the drugs under the applicable therapeutic classification and a list in alphabetical order (index) of the available drugs. The Preferred Drug List does not include all drugs covered under the Pharmacy Benefit. For additional information, reference should be made to the policy.

Los medicamentos en esta Lista de Medicamentos Preferidos han sido seleccionados por su seguridad, efectividad en el tratamiento de condiciones de salud y su costo.

The medications in this Preferred Drug List have been selected based on their safety, cost, and effectiveness to treat health conditions.

En las páginas a continuación presentamos toda la información requerida para facilitarte la lectura e interpretación.

The following pages include all the information you will need to help you read and interpret the List.

Te exhortamos a que evalúes con tu médico los medicamentos disponibles en esta Lista de Medicamentos Preferidos para tratar tu condición. Nuestra lista tiene una diversidad de medicamentos por condición. Si utilizas estos medicamentos contribuyes a mantener los costos del beneficio de farmacia en un nivel razonable y tus copagos serán menores.

We urge you to talk with your doctor and evaluate the medications available in this Preferred Drug List to treat your condition. Our List contains a variety of medications classified by condition. If you use these drugs, you will be helping keep the pharmacy benefit costs at a reasonable level, and your co-payments will also be lower.

La Lista de Medicamentos Preferidos se revisa periódicamente y está sujeta a cambios basado en el Comité de Farmacia y Terapéutica.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]; SL = Specialty Limit [Límite de Especialidad]

El hecho de que un medicamento recetado se incluya en este Formulario no garantiza que esté cubierto bajo su plan. Es importante que consulte el Beneficio de Farmacia de su plan para determinar si un medicamento que forma parte de este Formulario está cubierto bajo su plan. Por favor, revise su Beneficio de Farmacia para confirmar que su medicamento está cubierto.

The fact that a prescription medication is included in this Formulary does not guarantee that it is covered under your plan. It is essential that you review the Pharmacy Benefit of your plan to determine if a medication listed in this Formulary is covered under your plan. Please review your Pharmacy Benefit to confirm that your medication is covered.

PARTE I - DISEÑO DE LA LISTA DE MEDICAMENTOS / *PART I- DRUG LIST DESIGN*

¿Cómo usar esta lista de medicamentos? / *How do I use the drug list?*

La forma más fácil para conseguir los medicamentos es buscando en el índice. El índice provee una lista por orden alfabético de todos los medicamentos que se presentan en este documento, tanto los de marca como los genéricos. Al lado del medicamento está el número de la página donde encontrarás cómo está cubierto. Busca la página indicada en el índice y encuentra el nombre del medicamento en las columnas.

The easiest way to find the drugs is through the Index. The Index gives you an alphabetical list of all the drugs in this document, both brand name and generic drugs. Next to the drug, you will see the page number where you can find the coverage information. Turn to the page listed in the Index to find the name of the drug listed in the columns.

Guías de Referencia / *Reference Guidelines*

Medicamentos que requieren preautorización (PA) / *Medications requiring prior authorization (PA)*

En un esfuerzo por garantizar la seguridad y el uso apropiado de los medicamentos, algunos necesitan una preautorización para ser adquiridos. Los mismos se han identificado a la derecha con **PA (requiere preautorización)**, en cuyo caso, la farmacia gestiona la preautorización previo al despacho del medicamento.

To guarantee the safe and effective use of drugs, there are certain drugs that need a prior authorization (PA) before dispensing it. A PA is placed next to the name of the drug to identify them, and the pharmacy will process the prior authorization before dispensing it.

Los medicamentos que requieren preautorización usualmente son candidatos al uso inapropiado o están relacionados con un costo elevado por lo que requieren que el asegurado cumpla con unos criterios antes de ser despachados. Aquellos medicamentos que han sido identificados que requieren preautorización deben satisfacer los criterios clínicos establecidos según lo haya determinado el Comité de Farmacia y Terapéutica. Estos criterios clínicos se han desarrollado de acuerdo a la literatura médica actual.

The drugs that need prior authorization are those for which you need to meet certain criteria before using them, are likely to be used inadequately, or have a higher cost. Drugs identified as needing prior authorization should fulfill the clinical criteria, as determined by the Pharmacy and Therapeutics Committee. The criteria have been developed as stated by current medical literature.

También, tienen requisito de PA aquellos medicamentos de alto costo (verifica tu certificado de beneficio). La farmacia enviará copia de la receta y se encargarán del proceso.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]; SL = Specialty Limit [Límite de Especialidad]

High Cost Drugs will require a prior authorization (check your health plan benefits). The pharmacy will send a copy of the prescription to the health plan and will take care of the process.

Programa de Terapia Escalonada (ST) / Step Therapy Program (ST)

En algunos casos, requerimos que utilices primero un medicamento como terapia para tu condición antes de que cubramos otro para esa condición (Terapia Escalonada, ST por sus siglas en inglés). Por ejemplo, si el Medicamento A y el Medicamento B se usan ambos para tratar tu condición médica, nosotros requerimos que utilices primero el Medicamento A. Si el Medicamento A no te funciona, entonces cubrimos el Medicamento B.

In some cases, you need to try one drug first to treat your health condition before we cover other drugs for the same condition (Step Therapy). For example, if Drug A and Drug B both treat your health condition, you may need to use Drug A first. If Drug A does not work for you, then we will cover Drug B.

Límites de cantidad (QL) / Limits on the amount to be dispensed (QL)

Ciertos medicamentos tienen un límite en la cantidad a despacharse. Estas cantidades se establecen de acuerdo a lo sugerido por el fabricante como la cantidad máxima adecuada que no está asociada a efectos adversos y la cual es efectiva para el tratamiento de una condición. En el área de Requisitos de la lista de medicamentos se identificaron los límites en la cantidad a despacharse, en aquellos que aplique.

Certain drugs have a limit on the amount to be dispensed. These amounts are established according to the manufacturer's recommendation for adequate amounts to avoid adverse effects and effectively treat a health condition. The Requirements column in the Drug List points out the quantity limits for applicable drugs.

Límites de especialidad médica (SL) / Medical specialty limits (SL)

Algunos medicamentos tienen un límite en la especialidad médica. Estos límites de especialidad se establecen de acuerdo a la literatura médica actual.

Some drugs have medical specialty limits. These limits are established in line with current medical literature.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]; SL = Specialty Limit [Límite de Especialidad]

Límites de edad (AL) / Age limits (AL)

Algunos medicamentos tienen un límite de edad.

Some drugs have an age limit.

Éditos de análisis de utilización (DUR) / Edits for Drug Utilization Review (DUR)

A través del Programa de Beneficio de Farmacia de Triple-S Salud, Inc. se han implantado los siguientes éditos de análisis de utilización (*DUR*, por sus siglas en inglés) con el propósito de evitar complicaciones a los asegurados, ofreciendo un mejor cuidado.

Through the Pharmacy Benefit Management Program, Triple-S Salud has implemented the following drug utilization review (DUR) edits to avoid other health problems while offering you a better care.

- Édito de Validación de Dosis - coteja las dosis máximas diarias para la población pediátrica, adulta y geriátrica. / *Dose check edits - Verify daily maximum doses for pediatric, adult and geriatric population.*
- Édito de Terapia Duplicada -verifica tu historial de medicamentos para recetas duplicadas, de dos formas:/ *Duplicate Therapy edits- Verify your drug history for duplicate prescriptions in two ways:*
 1. Si recibes el mismo medicamento (Ej. mismo ingrediente activo) con dos recetas distintas (Ej. número de receta distinto, puede ser la misma farmacia o farmacias diferentes). / *If you get the same drug (e.g. same active ingredient) with two different prescriptions (e.g. prescription number is different; could be through the same pharmacy or different ones).*
 2. Si recibes dos medicamentos de la misma clase terapéutica, por ejemplo, dos antidepresivos o dos analgésicos, entre otros. / *If you get two drugs of the same therapeutic category, such as: two antidepressants or two analgesics.*

Hay ciertas excepciones a estos éditos. Se solicita a los médicos que incluyan la siguiente información en la receta: / There are exceptions to these edits. We suggest that your doctor includes in the prescription:

- Cambio en dosis / Change in dose

Si aumentó la dosis y necesitas más medicamentos antes de tiempo, en este caso se necesita una carta de justificación de parte del médico indicando el cambio en dosis. La farmacia requerirá una preautorización a *Triple-S Salud*, luego de que se reciba la información necesaria en la receta. / *If the dose*

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]; SL = Specialty Limit [Límite de Especialidad]

is increased and you need your drug right away, a letter from your doctor justifying the dose change will be needed. The pharmacy will need a prior authorization after the necessary information is received.

1. Si la dosis se determina por tu peso, el médico debe indicar tu peso y estatura en la receta. / *If the dose is determined by weight, the doctor must write your weight and height in the prescription.*
2. Cuando la dosis se ajuste de acuerdo a los niveles en tu sangre, el médico debe indicarlo así en la receta (Ej. ajuste de niveles para tiroides, teofilina, anticonvulsivos, warfarina). / *When the dose of the drug is changed as a result to your blood levels, the doctor must write it in the prescription (e.g.: changes for thyroid, theophylline, anti-convulsiveness, and warfarin).*
3. Cuando para la dosis indicada en la receta no existe su presentación farmacéutica. Por ejemplo, la tableta viene de 25 mg y 50 mg, pero necesitas 75 mg (dosis indicada y aceptada). La farmacia requerirá una preautorización a Triple-S Salud, Inc. / *When the dose written in the prescription does not exist in the pharmaceutical dosage form of the drug. For example, the tablet exists in 25 mg and 50 mg, but you need a 75 mg dose (dose needed and accepted)*
